About DHMA e.K.

Dear Sirs and Madames,

As a globally established consulting and trading company, we realize with our customers sophisticated projects in the field of engineering and plant construction.

Especially in the field of advisory-intensive industrial goods we help interested parties as a specialist partner. DHMA buys, sells and broker machines, plants and complete production facilities. If necessary, we offer services like dismantling, transport, machine overhauling and repairs as well as recommissioning. We allocate the capable specialist for the respective type of machine and hence save resources and avoid redundancy. Our aim is a flexible and optimized care of projects to meet the requirements of our clients.

If you need other machines and equipment, please send us the corresponding project details by e-mail or fax. Thank you!

We look forward to a fruitful collaboration. Please do not hesitate to contact us when in need of more information.

Yours faithfully

DHMA e.K.
